BASTYR UNIVERSITY
California

THE STATE'S PREMIER SCHOOL OF NATUROPATHIC MEDICINE

Bastyr University California became the state's first and only accredited institution for naturopathic medicine in 2012.

A second area of study, MS in Nutrition For Wellness has been added to campus with the potential of adding more in the future.

Founded in 1978 in Seattle, nonprofit Bastyr University is the world's leading academic center for the natural health arts and sciences, offering more than 20 degree and certificate programs. The University's expansion to California is its first out-of-state venture.

BASTYR UNIVERSITY CLINIC

As the teaching clinic of Bastyr University California, Bastyr University Clinic offers comprehensive health care from pediatric to geriatric.

Our licensed doctors focus on naturopathic primary care, mind-body issues and nutrition, with a focus on:

- Providing a natural, non-invasive approach that takes into account the whole person.
- Helping patients resolve chronic health problems.
- Supporting a healthy lifestyle that helps prevent illness.
- Identifying and treating the causes of disease, trusting in the healing power of nature.

Since opening in the fall of 2012, Bastyr University's San Diego Clinic has already expanded its patient care facility and has plans to add additional natural health services in the future.

WHY CALIFORNIA

California is one of the only 16 states to license naturopathic doctors to practice as primary care professionals, yet the state has an acute primary care shortage, an opportunity that could be filled by naturopathic doctors.

HOW WE CAN HELP

Bastyr University California's faculty members are natural health care experts, and many are nationally and internationally recognized for their work. They are available to provide expert, consumer-friendly health advice to the media.
