

SCHOOL OF ACUPUNCTURE AND ORIENTAL MEDICINE

ADMINISTRATORS OF THE SCHOOL OF ACUPUNCTURE AND ORIENTAL MEDICINE

Dean to be announced
 Associate Dean, Clinical Education; DAOM Program Director to be announced
 Molly Parkhurst, Program Supervisor
 Cheryl Cuevas, Administrative Assistant

OVERVIEW

The field of acupuncture and Oriental medicine in America is rooted in the traditional medicine of China that has evolved over the past several thousand years. The contemporary model of natural health care education and practice in China is the combined system of traditional Chinese medicine (TCM) and Western medicine. This system has strongly inspired the current programs in acupuncture and Oriental medicine (AOM) at Bastyr University.

Established in 1988, the School of Acupuncture and Oriental Medicine currently offers the following degree/certificate options:

- Bachelor of Science in Natural Health Sciences/ Master of Science in Acupuncture (BS/MSA) (see page 34)
- Bachelor of Science in Natural Health Sciences/ Master of Science in Acupuncture and Oriental Medicine (BS/MSAOM) (see page 34)
- Master of Science in Acupuncture (MSA) (see page 35)
- Master of Science in Acupuncture and Oriental Medicine (MSAOM) (see page 35)
- Certificate in Chinese Herbal Medicine (CCHM) – postgraduate offering (see page 40)
- Doctor of Acupuncture and Oriental Medicine (DAOM) – postgraduate offering (see page 41)

These programs are closely interrelated and require the same foundational studies in traditional Chinese medicine.

MASTER'S PROGRAM MISSION STATEMENT

The mission of the acupuncture and Oriental medicine program at Bastyr University is to prepare excellent practitioners. This is accomplished through rigorous training in traditional Chinese medicine with an emphasis on collaborating with other health care disciplines. The program is committed to producing graduates who are respected among their health care

peers, dedicated to service in their community, and prepared for lifelong learning in the field.

EXPECTED LEARNING OUTCOMES

The school of Acupuncture and Oriental Medicine's master's program trains graduates to be the following:

1. Safe and effective in the care of patients by demonstrating in-depth ability in the following areas:
 - a. Knowledge of traditional Chinese medicine diagnostic strategies and their application to individual cases
 - b. Skill in the traditional methods of assessment of patients including interviewing, palpation and observation
 - c. Competence in selecting the appropriate treatment modalities and plans for a patient utilizing acupuncture, tui na, Chinese herbs (relevant to the MSAOM) and lifestyle counseling
 - d. Skill in the application of acupuncture techniques in an appropriate and safe fashion for each patient
2. Able to integrate Eastern and Western paradigms of medicine for the purposes of informing the practice of traditional Chinese medicine, communicating with other health care professionals and patients, and making appropriate medical referrals when necessary
3. Professional in their approach to setting up and maintaining a private practice, collaborating with other health care professionals, working in an integrated health care setting and providing leadership within the acupuncture and Oriental medicine field
4. Capable of accessing research information and critically assessing the value of published clinical research in the field
5. Able to provide health prevention measures based on traditional Chinese medicine theory (such as tai chi, qigong, and therapeutic nutrition) to support the well-being of their patients and themselves
6. Qualified to pass national and state acupuncture and/or herbal exams

RECOGNITION AND LICENSURE OF ACUPUNCTURE AND ORIENTAL MEDICINE

The Master of Science in Acupuncture (MSA), the Master of Science in Acupuncture and Oriental Medicine (MSAOM) and the Doctor of Acupuncture and Oriental Medicine (DAOM) degree programs at Bastyr University are accredited by the Accreditation Commission for Acupuncture and Oriental Medicine (ACAOM), 7501 Greenway Center Dr., Suite 760, Greenbelt, MD 20770, 301.313.0855. Bastyr University is accredited by the Northwest Commission for Colleges and Universities, 425.558.4224, and thus all degree offerings are accredited and eligible for Title IV funds.

The Master of Science programs are approved by the Washington State Department of Health. Graduates of Bastyr University's MSA and MSAOM programs are eligible to apply for licensure in acupuncture in Washington state, as well as in most other states offering similar licensure. Applications for licensing in Washington can be obtained by contacting the Washington State Department of Health, Professional Licensing - Acupuncture, P.O. Box 47868, Olympia, WA 98504-7868, 360.236.4700. Applications for licensing in California can be obtained by contacting the Department of Consumer Affairs, Acupuncture Board, 444 N. Third Street, Suite 260, Sacramento, CA 95814, 916.445.3021.

Currently, acupuncture is recognized in 44 states and the District of Columbia. The actual requirements for licensure can vary from state to state, with the majority of states requiring the successful completion of the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM) exam. If a student is interested in licensure in a state other than Washington or California, it is imperative for the student to know the licensing requirements of that particular state in order to ensure that there are no outstanding academic requirements at the time of graduation. Academic advising is available to help students who may have additional requirements to meet.

ACUPUNCTURE AND ORIENTAL MEDICINE ADMISSIONS

For general information on the admissions process, please refer to the Admissions section in this catalog. The information below refers only to the acupuncture and Oriental medicine programs. It is strongly recommended that applicants receive acupuncture and/or a traditional Chinese medicine

treatment prior to applying to the program. Additionally, applicants will benefit from reading about and researching the field of Oriental medicine via the mainstream press and Internet.

REQUIRED ABILITIES/SKILLS FOR ACUPUNCTURE AND ORIENTAL MEDICINE PROGRAM ADMISSION

A candidate for the acupuncture and Oriental medicine degree must be able to demonstrate appropriate observational and communication skills, motor function, intellectual-conceptual, integrative and quantitative abilities, and behavioral and social maturity. A candidate should be able to perform in a reasonably independent manner.

Observation: A candidate must be able to observe a patient accurately at a distance and close at hand. Observation necessitates the functional use of the sense of vision and somatic sensation. These are enhanced by the functional use of the sense of smell.

Motor: Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other diagnostic maneuvers. A candidate should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients such as CPR and application of pressure to stop bleeding and the opening of obstructed airways. Such actions require coordination of both gross and fine muscular movements, equilibrium and functional use of the sense of touch and vision.

Observation and motor skills must be in coordination with each other in order to safely practice many of the diagnostic and clinical techniques specific to Oriental medicine. A combination of observation and motor skills are required for acquiring diagnostic information from patients as well as for the clinical portion of the training which includes the safe insertion and manipulation of acupuncture needles, cupping, moxibustion, etc.

Communication: A candidate should be able to speak, to hear and to observe patients in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech but reading and writing. The candidate must be able to communicate effectively and efficiently in oral and written form with all members of the health care team.

Intellectual-Conceptual, Integrative and Quantitative Abilities: These abilities include measurement, calculation, reasoning, analysis and synthesis. Problem solving, which is a critical skill for health care practitioners, requires all of these intellectual abilities. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral and Social Attributes: A candidate must possess the emotional health required for full utilization of her/his intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the diagnosis and care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and education processes.

AGE OF COURSE

Required chemistry and biology courses not taken within seven years of matriculation into the program are subject to review by the admissions committee. Additional coursework may be required.

TRANSFERS

Students who wish to transfer from other acupuncture and Oriental medicine programs are accepted on a space-available basis and must meet the same entrance requirements at the class level they seek to enter. Transfer credit is evaluated on an individual basis following completion of the application process. Transfer applicants must submit a \$75 transfer evaluation fee.

Applicants must provide an official transcript from the college or program from which the transfer is being requested, demonstrating that they are leaving in good academic standing.

Applicants must submit syllabi for the courses they completed in their acupuncture program and should be prepared to submit additional documentation to support a thorough evaluation. If a transfer student is found to be deficient in some area(s) of study, s/he may be required to complete additional

courses at Bastyr University. For more information on the transfer admission policies and procedures, contact the admissions office.

COMBINED BACHELOR'S/ MASTER'S PROGRAM

Students who have completed at least two years at the undergraduate level (60 semester credits or 90 quarter credits) have the opportunity to earn their bachelor's degree in combination with either the Master of Science in Acupuncture or the Master of Science in Acupuncture and Oriental Medicine. Master's program prerequisites must also be met prior to matriculation. The bachelor's degree is awarded at the time of graduation from the master's program.

PREREQUISITES FOR BS/MSA OR BS/MSAOM

Entering undergraduates must have earned at least a 2.75 cumulative grade point average, with a grade of C or better in all basic proficiency and science requirement courses. Prior to enrolling, students must have completed 90 quarter credits (60 semester credits) including a minimum number of credits in basic proficiency, science and general education categories. Surplus credits not used to satisfy basic proficiency or science requirements may be applied to the appropriate general education requirements. Note that students may apply to the program while completing prerequisite coursework.

Students entering the BS/MS program as undergraduates are required to maintain a minimum 2.75 GPA for the first year of their studies, regardless of credits. Starting with the second academic year, students are required to maintain a minimum 3.0 GPA. Please see the Academic Status and Graduation Requirements section for additional information on grading.

BASIC PROFICIENCY AND SCIENCE REQUIREMENTS

English literature or composition.....	9 quarter credits
Intermediate algebra.....	1 course ¹
General psychology.....	3 quarter credits
General chemistry (allied-health level with lab).....	4 quarter credits ²
General biology (allied-health level) with lab.....	4 quarter credits

¹Intermediate algebra is not college level, and the credits will not transfer in toward degree completion.

²Survey-level class that covers inorganic chemistry and includes a lab component. Intended for students in allied-health majors.

GENERAL EDUCATION REQUIREMENTS

Natural sciences and mathematics.....	12 quarter credits
Arts and humanities.....	15 quarter credits
Social sciences	15 quarter credits
Speech communication or public speaking ...	3 quarter credits
Electives.....	25 quarter credits ¹

¹The number of elective credits may vary depending upon the exact number of quarter credits earned in the other prerequisite categories. Total prerequisite credits must equal at least 90 quarter credits.

MASTER OF SCIENCE IN ACUPUNCTURE

The MSA provides the didactic and clinical training necessary for eligibility for the National Commission for the Certification of Acupuncture and Oriental Medicine (NCCAOM) exam, which is the basis for licensing in most states. The MSA program is a three-calendar-year course of study.

MASTER OF SCIENCE IN ACUPUNCTURE AND ORIENTAL MEDICINE

The MSAOM is the model comprehensive degree program. It includes all the didactic and clinical training of the MSA but also includes training in Chinese herbal medicine and an introduction to Chinese medical language. The MSAOM program is a three-and-a-half-calendar-year course of study.

PREREQUISITES FOR MSA/MSAOM

Entering students must have a bachelor's degree from a regionally accredited college/university and must have completed the following courses or their equivalent:

Intermediate algebra.....	1 course
General chemistry (allied-health level with lab)	1 course ^{1,2}
General biology (allied-health level with lab).....	1 course ²

General psychology..... 1 course
Note: All students must complete a CPR-C level course or equivalent prior to entering clinic.

¹Survey-level class that covers inorganic chemistry and includes a lab component. Intended for students in allied-health majors.

²Science classes must have been taken within seven years of entering the program. If not, additional coursework may be required after the admissions committee review.

CLINIC

The core of the program's clinical training takes place at Bastyr Center for Natural Health, the University's teaching clinic. Bastyr Center is a comprehensive, multidisciplinary clinic providing quality training for

students in all of the University's programs. Within the acupuncture and Oriental medicine clinic, students receive clinical training in acupuncture and Chinese herbs. In addition to training at the University clinic, students have the opportunity to train at several community medical sites that provide clinical experience in working with diverse populations.

The clinical training program begins in the first year and is comprised of three observation shifts, one preceptorship and either 14 (MSA) or 16 (MSAOM) student clinician shifts. The three observation shifts can be completed in any of the five quarters preceding clinician status. All observation hours, shifts and interim observation hours must be completed prior to starting as a student clinician, in spring of the second year. The preceptorship shift may be performed in either the observation or clinician phase of training. A minimum of one observation shift must be completed in order to do a preceptorship. Students in the MSAOM program or the CCHM program also take eight Chinese herbal shifts and two Chinese herbal dispensary shifts in the latter portion of their program. On a space available basis, students are welcome to take additional clinic shifts for elective credit. However, elective shifts cannot be used to make up missing hours in core shifts due to prior or future absences.

Admission as a clinician to the AOM student training clinic at Bastyr Center for Natural Health is based on: 1) good academic standing, 2) completion of a bachelor's degree or being enrolled in or graduated from an acupuncture master's program, 3) completion of the required prerequisite curriculum, 4) successful passage of the clinic entry written and practical exam, 5) current CPR for health care provider certification, and 6) certification in Clean Needle Technique (CNT).

Please be aware that the opportunity to be placed at one of the external clinics offered through Bastyr University is contingent on the student's ability to provide documentation of a vaccination history. If this documentation is unavailable or out of date, students will need to update their vaccines at either local health centers or through their personal physicians. The community clinic rotations are outstanding clinical experiences in working with underserved and special patient populations, including developing skills working with medical translators. Students who are unable to provide vaccine documentation will not be eligible for this rotation and clinical training may be restricted to the Bastyr student clinic. Students are also required to submit to a national criminal background check.

For more information, see “Background Checks” in the *Academic Policy and Procedure Manual*, Student Policies and Procedures section of MyBU.

CHINA STUDIES

Students in good academic standing are encouraged to apply for advanced studies in China and may earn eight (8) clinical credits. Students are placed at Sichuan Integrated Hospital of Eastern and Western Medicine in Chengdu or Shanghai University of Traditional Chinese Medicine. Permission to attend is at the discretion of the School of AOM and depends on a number of additional factors, such as interpersonal skills, maturity and depth of clinical skills. For an application, see the AOM clinic section. Students who plan to study in China are required to take the one-credit elective OM6820 Clinic Entry for China in summer quarter of their third year, immediately preceding their China trip.

SUMMER MASSAGE INTENSIVE

Bastyr University and the Bellevue Massage School Center for Healing Arts offer a summer massage training program that allows students to apply coursework taken at Bastyr University toward the Washington state requirements for massage licensure. This course cannot be audited. This program of study is an excellent future practice builder. The schedule for this training works particularly well for MSA students. Students interested in further information may meet with their academic advisor in the registrar’s office to discuss the program availability and the course prerequisites.

BASIC SCIENCES CURRICULUM WITHIN ACUPUNCTURE AND ORIENTAL MEDICINE

Basic science courses within acupuncture and Oriental medicine include Anatomy and Physiology, Organic Chemistry, Biochemistry, Microbiology, Pathology, and Pharmacology. These courses serve as a foundation for an understanding of the human body and provide students with the necessary skills and competency to pursue coursework in the AOM program. In addition, a portion of the AOM Anatomy and Physiology course is taught in Bastyr’s cadaver anatomy lab, thus giving students the unique opportunity to study anatomy in greater depth. Basic science courses in the doctoral program include Pathology of Cancer, Pharmacology and Advanced Living Anatomy.

The basic sciences faculty encourages and expects students to advance beyond the simple learning of

scientific facts and to integrate systematically the information from basic science disciplines into a unified model of human organization and function. This educational scheme requires students to assume an active role in the learning process and encourages them to adopt this inquisitive behavior for a lifetime. Problem solving, clinical cases and examples are an integral part of the basic science curriculum. This educational process is an expression of Bastyr University’s basic philosophy of a holistic approach to human behavior, health and therapeutics. The basic sciences faculty encourages students to pursue an integrated approach to learning and understanding. Instructors are readily available to facilitate this process on an individual basis.

The department also offers General Chemistry in a summer intensive format, which is a prerequisite requirement for the AOM program.

COUNSELING AND HEALTH PSYCHOLOGY CURRICULUM WITHIN ACUPUNCTURE AND ORIENTAL MEDICINE

The counseling and health psychology curriculum trains students in understanding and effecting change in the emotional, mental and spiritual dimensions of human functioning.

Students in acupuncture and Oriental medicine MS programs are required to take the following:

- PS5205: Patient Communications - 3 credits
- PS6100: Motivational Interviewing - 2 credits

Students in the DAOM program are required to take the following:

- PS8110: Counseling in Chronic Pain and Chronic/Terminal Illness - 3 credits

For additional counseling and health psychology courses available as electives to matriculated students, please see the course listings in this catalog or the current quarterly schedule of classes.

ACADEMIC STATUS AND GRADUATION REQUIREMENTS

A grade of C or higher is required to pass all AOM/CCHM courses. Students entering the BS/MS program as undergraduates are required to maintain a minimum GPA of 2.75 for the first year of their studies, regardless of credits. Starting with the second academic year, undergraduate students are required to maintain a minimum GPA of 3.0. Students entering the master’s program as graduate students or entering the Certificate in Chinese Herbal Medicine (CCHM) must maintain a minimum of a 3.0 GPA to be in good academic standing. Academic sanctions occur when the quarterly or cumulative

GPA drops below the minimum level or when a student receives PC, D or F grades. Students with a quarterly GPA below the minimum will be placed on academic warning status. Students who receive a PC, D or F in any one quarter, regardless of GPA, may be placed on probation status. Academic tutoring and support is available to assist students to return to good academic standing.

Students accepted into the Master of Science in Acupuncture (MSA) program must complete a total of 157.5¹ quarter credits with a minimum of 101 quarter credits in residence at Bastyr University. Students must maintain a minimum 3.0 GPA.

Students accepted into the Master of Science in Acupuncture and Oriental Medicine (MSAOM) program must complete a total of 219.0¹ quarter credits with a minimum of 144 quarter credits in residence at Bastyr University. Students must maintain a minimum 3.0 GPA.

Students earning the MSA must complete their degree requirements within four years and MSAOM within six years, including any credits completed as a bachelor's student and applied toward the master's. Students must complete at least two-thirds of their credits in residence at Bastyr University.

Students earning the DAOM must complete their degree within five years. Students must complete at least two-thirds of their credits in residence at Bastyr University. Students must maintain a minimum 3.0 GPA to be in good academic standing.

The Certificate in Chinese Herbal Medicine (CCHM) program has a total of 62 required credits of coursework and clinical training. To earn the certificate, at least 41 credits must be completed in residence. To maintain good academic standing, students in the CCHM program must maintain a term and/or cumulative GPA of 3.0 or better. The CCHM is a graduate course of study and, as such, follows the grading policies of the school of AOM degree programs.

Students accepted into the combined Bachelor/Master of Science degree program receive their bachelor's degree upon graduation from the master's program. If a student voluntarily or involuntarily leaves the program prior to completion of the master's, she/he may be eligible for a bachelor's degree if the student has a combined upper and lower division quarter credit total of 180 credits (specific course requirements also apply. See the dean for further information.) Furthermore, a student must have a minimum of 45 quarter credits in residence at Bastyr University.

In order to receive a license to practice acupuncture in the majority of states a student must earn either an MSA or MSAOM degree, pass the NC-CAOM licensing exam and meet any additional state requirements. Several states require Chinese herbal medicine training for licensure (e.g., CA, FL, NM, TX). Students graduating with an MSA degree may need to consider taking the CCHM program as a postgraduate option to meet this requirement.
¹*Credits do not include prerequisites/corequisites.*

Students may enter their course of study either into the combined BS/MS programs or directly into the MS programs. (The programs described below include required curriculum for the Bachelor of Science programs.)

ELECTIVES

The School of Acupuncture and Oriental Medicine continually develops and adds to its special topics and elective course curriculum. These courses are included in the course description section of the catalog.

The MSA requires completion of eight elective credits. The MSAOM requires completion of five elective credits. For dual-track (ND/AOM) students, please see the dual-track program requirements listed in the School of Naturopathic Medicine section.

The following curriculum tables list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot).

¹Corequisite courses to the MSA program: The MSA curriculum has been designed so students missing one or more of these may take them after matriculating at Bastyr University. Previously

completed coursework from other accredited institutions may satisfy these corequisites.

²Observation 1-3 can be taken in any of the five quarters preceding clinician status.

³Preceptorship can be taken during observation or clinician phase, once Observation 1 is completed.

⁴Students are required to complete a total of 36 interim clinic hours. (Usually students staff the shifts they were assigned to in the quarter just ended.) Students register and pay for this shift in their last quarter of attendance.

⁵All students who plan to study in China must take the one-credit required class Clinic Entry for China in summer quarter of year three, just preceding their China rotation. This course may be counted toward the nine required elective credits.

Elective Requirements: MSA

Qtr.Cat. No.	Course Title	Crdt.	Lec.	L/C	Tot
variable	Elective & Special Topics ⁶	8	8	0	88
	Total Elective Credits and Hours	8	8	0	88

⁶Electives/Special Topics: The MSA program requires a total of nine (9) elective/special topics credits. These credits may be any general electives/special topics as long as the prerequisites for each course are met.

For students who are approved to take an optional clinic in China, eight (8) credits (16 lab hours) will be applied toward AOM Clinical hours.

Total Requirements: MSA

	Crdt.	Lec.	L/C	Tot

¹Corequisite courses to the MSAOM program: The MSAOM curriculum has been designed so students missing one or more of these may take them after matriculating at Bastyr University. Previously completed coursework from other accredited institutions may satisfy these corequisites.

²Observation 1-3 can be taken in any of the five quarters preceding clinician status.

³CH6831, CH6832 may be taken any quarter in the herbal program.

⁴Preceptorship can be taken during observation or clinician phase, once Observation 1 is completed.

⁵Students are required to complete a total of 36 interim clinic hours. (Usually students staff the shifts they were assigned to in the quarter just ended.) Students register for and pay for this shift in their last year of attendance.

⁶All students who plan to study in China must take the one-credit required elective Clinic Entry for China in summer quarter of year three, just preceding their China rotation. This course may be counted toward the six required elective credits.

⁷CH6105 may also be taken in the summer of year two or three.

Elective Requirements: MSAOM

Qtr.	Cat. No.	Course Title	Crdt.	Lec.	L/C	Tot.
variable		Elective & Special Topic	5	5	0	55
		Total Elective Credits and Hours	5	5	0	55

Electives/Special Topics: The MSAOM program requires a total of six (6) elective/special topics credits. These credits may be any general electives/special topics as long as the prerequisites for each course are met. Clinic in China is an eight (8) credit experience to be applied toward AOM Clinical, CHM shifts and/or elective credit. These credits may not be audited.

Total Requirements: MSAOM

CERTIFICATE IN CHINESE HERBAL MEDICINE (CCHM)

The Chinese herbal medicine certificate program is designed for those seeking comprehensive training in the field of Chinese herbal medicine. This program is a postgraduate course for acupuncturists.

The CCHM curriculum enables students to gain skills and knowledge in the principles of Chinese herbology, including materia medica, formulations, prepared medicines, dispensary, herbal therapeutics and clinical training at the Chinese herbal medicine teaching clinic. The CCHM curriculum covers a minimum of 300 herbs and other therapeutic substances and a minimum of 150 herbal formulas. Case studies are presented to enhance the learning process. Students also gain skills in understanding drug/herb interactions — a very relevant topic for today’s practitioners. At the conclusion of the certificate program, graduates have enhanced their academic skills through clinical training and have gained the traditional Chinese medicine diagnostic skills to assess and diagnose syndromes relevant to traditional Chinese medicine. They also are prepared to determine and use appropriate Chinese herbal therapies within the appropriate professional scope of practice.

EXPECTED LEARNING OUTCOMES

The Chinese Herbal Medicine Certificate trains graduates to be the following:

1. Safe and effective in the care of patients by demonstrating in-depth ability in the following areas:
 - a. Knowledge of traditional Chinese medicine diagnostic strategies and their application to individual cases
 - b. Skill in the traditional methods of assessment of patients, including interviewing, palpation and observation
 - c. Competence in selecting the appropriate treatment modalities and plans for a patient

utilizing Chinese herbs (relevant to the MS-AOM) and lifestyle counseling

- d. Skill in the application of herbs and Chinese herbal formulas in an appropriate and safe fashion for each patient
2. Able to integrate Eastern and Western paradigms of medicine for the purposes of informing the practice of traditional Chinese medicine, communicating with other health care professionals and patients, and making appropriate medical referrals when necessary
3. Qualified to pass national and state acupuncture and/or herbal exams

PREREQUISITES

The CCHM is a postgraduate course of study that includes both didactic and clinical training. The minimum requirement for the CCHM is either a master’s degree in acupuncture or a certificate in acupuncture with 10 years of documented clinical experience. Applicants need to have completed or be in the process of completing the following coursework: Intermediate algebra 1 course
 General psychology..... 3 quarter credits
 General chemistry (allied-health level with lab) 4 quarter credits
 General biology 1 course

The following classes are corequisites and may be completed while taking CCHM classes:

- Survey of Organic Chemistry
- Biochemistry
- Microbiology

CCHM applicants must have a background in the basic sciences that is comparable to Bastyr University’s master’s curriculum. Upon review of past coursework, applicants may be asked to take a higher level science course or complete a competency exam.

CALIFORNIA LICENSURE REQUIREMENTS

The CCHM curriculum is designed to meet the current Chinese herbal medicine requirement portion for California acupuncture licensure. (The California licensing exam requires comprehensive training in acupuncture as well as CHM.) Those interested in California licensure should complete the MSAOM program or complete the MSA and return to the CCHM program as a postgraduate student.

CHINA STUDY

Students in the CHM certificate program may also choose to study in China. (Please see the China Studies section in the AOM master’s program de-

scription.) Students who choose to complete the China studies must take an additional one-credit course, OM6820 Clinic Entry for China, in the summer quarter immediately preceding their trip.

The following curriculum tables list the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot).

ACUPUNCTURE AND ORIENTAL MEDICINE DOCTORAL PROGRAM

MISSION STATEMENT

The mission of Bastyr University's Doctor of Acupuncture and Oriental Medicine program is to develop the knowledge and skills of qualified practitioners in the specialties of integrated oncology and advanced pain management. The program accomplishes this through rigorous training in traditional Chinese medicine and biomedical concepts, and by emphasizing an integrative model of care delivery. The program graduates leaders in the field of acupuncture and Oriental medicine prepared for lifelong learning and achievement in clinical practice, education and scholarship.

EXPECTED LEARNING OUTCOMES

Graduates of the School of Acupuncture and Oriental Medicine's clinical doctoral program will have the skills to:

- develop an advanced TCM diagnosis and treatment plan including all applicable modalities within the scope of practice, commensurate with patients' health statuses.
- demonstrate an understanding of allopathic oncology and pain treatment protocols in order to inform TCM care.
- discuss treatment planning issues as part of an integrated medical team.
- demonstrate an ability to participate as part of a clinic supervisory team educating master's students in acupuncture and Oriental medicine.
- conduct research that demonstrates knowledge and skills in study design and comprehension.

The AOM clinical doctorate is focused on training students in cancer care and advanced pain management and treatment with an emphasis on training in integrated clinical settings. Students develop skills in clinical research and teaching with an in-depth focus on a medical specialty. Courses include advanced Chinese medical classics, advanced acupuncture techniques, Chinese herbs

and therapeutics classes. Basic science classes focus on oncology and pain conditions pertaining to pathology and pharmacology. The curriculum also includes nutrition and patient management courses. A capstone research project is required.

The degree title is “DAOM,” Doctor of Acupuncture and Oriental Medicine. At the present time, there is no change in scope of practice for DAOM graduates. Students would choose to pursue this training if they are 1) interested in a doctoral degree in traditional Chinese medicine, 2) interested in oncology and management of advanced pain conditions and /or 3) interested in learning to conduct clinical research. This is a clinical doctoral degree, not a PhD program.

CLINICAL COMPONENT

The DAOM program emphasizes clinical training in integrated care settings, with rotations at Bastyr Center for Natural Health, Seattle, Washington; Providence Regional Medical Center, Everett, Washington; and Skagit Valley Hospital Regional Cancer Care Center, Mount Vernon, Washington. As part of the clinical training, DAOM students travel to China and complete additional studies at Sichuan Integrated Hospital of Eastern and Western Medicine in Chengdu and Shanghai University of Traditional Chinese Medicine. Students take a one-credit course, Clinic Entry for China, in preparation for China studies.

There are additional expenses associated with the China studies other than tuition, including travel, lodging and living expenses, and laboratory fees assessed by institutions in China. With planning, these expenses can be covered by financial aid. Bastyr University holds fundraising events to support China studies. DAOM students may choose to participate in these fundraising events to help defray travel expenses in China. See the DAOM program director for more information.

CAPSTONE THESIS PROJECT

As part of the program of study, DAOM students must complete a capstone research project. Capstone projects may take a variety of formats, including clinical or basic research, surveys, translation, systematic review or theoretical analysis. Students are expected to conduct and complete their capstone project, including final acceptance of their capstone paper, by the time all other program requirements are completed. If additional time is needed for completion and all other program

requirements are finished, then students will be assessed an additional fee (equal to 1 credit of tuition) in the quarter in which their capstone is submitted. Please see OM8199 “Capstone Continuation” and/or the *Capstone Project Handbook* for further details.

PREREQUISITES

Minimum prerequisites for the DAOM are a master’s degree in acupuncture or acupuncture and Oriental medicine or a certificate of acupuncture with 10 years of documented clinical experience. Prospective students with certificates of acupuncture should contact the admissions office for specialized assistance.

Applicants with AOM master’s degrees must have graduated from an ACAOM-candidate or -accredited program and have formal academic training in Chinese herbs. If applicants do not have a Chinese herb background, then they must complete the Certificate in Chinese Herbal Medicine as a prerequisite. Students may begin their doctoral studies if the classroom portion of the certificate has been completed. The clinical portion of the CCHM may be done concurrently with the DAOM program.

Applicants to the doctoral program need to either have completed or be in the process of completing the following coursework:

- Intermediate algebra 1 course
- General psychology..... 3 quarter credits
- General chemistry
(allied-health level with lab) 4 quarter credits

Doctoral applicants must have a background in the basic sciences that is comparable to Bastyr University’s master’s curriculum. Upon review of past coursework, applicants may be asked to take a higher level science course or complete a competency exam. The minimum GPA for any past college-level education is 2.75.

The following curriculum table lists the tentative schedule of courses each quarter. Next to each course are the number of credits per course (Crdt.), the lecture hours each week (Lec.), the lab/clinic hours each week (L/C) and the total contact hours for the course over the entire quarter (Tot). This table reflects a full-time course of study. A part-time option is also available.

NATUROPATHIC MEDICINE/ ACUPUNCTURE AND ORIENTAL MEDICINE DUAL TRACK

Students in the Bastyr University naturopathic medicine program who are academically in good standing have the opportunity to apply to the Master of Science in Acupuncture (MSA) or the Master of Science in Acupuncture and Oriental Medicine (MSAOM) program in October of their second year of the four-year track. This requires a formal application to the acupuncture and Oriental medicine program through the admissions department, followed by a joint interview with both the AOM and ND schools. Please see page 86 in the "School of Naturopathic Medicine" section for a complete program description for dual-track studies.
